CHANGELOG
sipPROT

bicom
SYSTEMS

wiki.bicomsystems.com

5.4.1 - January 22, 2026

Improvements & Bug fixes:

• Configured the service to listen exclusively on the internal network MAN IPv6 address, reducing exposure and limiting the attack surface.

• Added notifications when sipPROT firewall protection is disabled on a host.

• Excluded sipPROT from backup host installations and ensured existing instances are stopped and removed during updates to prevent unintended license consumption.

• Improved sipPROT logging for configuration changes, including GeoIP policies and country settings.

• sipPROT is now compliant with Content Security Policy (CSP) in PBXware.

5.4.0

Improvements & Bug fixes:

- Fixed an issue where sipPROT Standalone could not resolve trusted domains.

- Added ability to block spam INVITEs from single IPs by setting a SIP Invite rate limit.

5.3.0

Improvements & Bug fixes:

- Fixed an issue where sipPROT on hosts failed to propagate events to sipprot-adm.

- Integrated API documentation into sipPROT GUI for Dynamic Denylist, Allowlist, Hosts, Denylist, and Attack Logs management.

- Attack detection and dynamic deny list now support IPv6.

- Administrators can now enable/disable TLS for their mail servers.

- Fixed an issue preventing sipPROT from configuring and protecting processing hosts on different networks.

- Fixed incorrect count of dynamically blocked addresses.

5.2.0

Improvements & Bug fixes:

- Removed validation on SMTP user/password fields and added indicator that fields are optional.

- Fixed sipPROT running in KVM VPS environments.

5.1.0

Improvements & Bug fixes:

- Added ability to import SMTP configuration and recipients from PBXware.

- Fixed a bug where sipPROT would block the source country of incoming IP.
